

Dear FCC and respective authorities,  
Don't you have enough to do? You focus your efforts on stifling the American public and for what purpose? To protect us from ourselves. We don't need your help and we don't want your recommendations. Every one of you should be happy to have a job because your efforts just draw people to other forms of entertainment where you don't have any control. Leave Mancow alone, Stop harassing Stern, let Janet show her titties if she wants to and get your nose out of a service that we pay for, do you understand that, we pay to have this programming and unless you are trying to eliminate this area of broadcasting then speak your intentions cause you stand on thin ground where your at.
